Utilize the Power of Image Archiving

ImageLinks' Check Archive is a powerful check archive and retrieval solution that provides you with the tools you need to streamline your operations.

- Open architecture allows the import of images from multiple capture systems
- Immediate availability of images to any authorized user
- Powerful search engine quickly locates checks and transactions according to multiple criteria, such as account number, check number, amount, date, and more.
- Quickly generate customized statements with images printed front and back
- Preview images and statements with multiple viewing options.

And You'll Reap the Benefits

Check archiving will transform your operations, enhance your efficiency, and improve customer service.

- Eliminates the need for microfilm and bulk storage
- Reduces long hours of item research to minutes
- Lessens paper handling
- Reduces statement preparation time
- Lessens postal charges
- Decreases operating expenses

Secure — Robust — Affordable

Check Archive

Discover the Operational Benefits of Check Archiving

ImageLinks' Check Archive provides improved productivity and efficiency, reduced operating expenses, and higher customer service.

- Customer Service Representatives can retrieve single checks, entire transactions, NSF items, Stop payments, and more — directly from their desktop
- Advanced item and check retrieval allows quick location of checks or transactions, allowing most customer inquiries to be handled over the phone
- Transactions and checks can be viewed and easily faxed, or emailed to a customer
- No more sorting, stuffing, and handling checks by hand — all statement preparation is done electronically at the operator's desktop.

Provide New Product Offerings with Check Archive

Increase customer satisfaction, while providing income opportunities for your financial institution.

- Electronic statements can be delivered to your customers via email
- Provide statements via CD-ROM for your larger customers
- Customized imaged statements can be quickly generated for key customers

Signature Verification

Signature verification is a must have for fraud detection, helping you identify, detect, and stop check fraud before it becomes a loss.

- Quick access to signature cards lets your tellers review potential check frauds before they are accepted.
- Presented with on-screen images, your tellers can review the image of the signature card next to the check that's being presented.

Take a targeted look at your competitors' customers

Thousands of transit items come through your institution each day. With Acquisition Information Manager (AIM), information from transit items can be analyzed and used to create a prospect list for market calls or mailings.
